**10 BOARDS  
OF  
ECO WOODS  
SAVE  
ONE TREE**

## GO GREEN

At Oriental Eco Woods we provide our customers with a new and innovative kind of environmentally friendly, composite wood. This unique combination of wood composite, polymer and additives ensure products from Oriental Eco Woods have no adverse environmental impact on our planet.

We do so because of our ever growing love for nature, humanity and the planet as a whole. This is reflected through the Oriental Eco Woods Foundation – an initiative funded through the sales of our wood products. It is a known fact, that we as humans need trees to survive, that they are the ties that bind our planet together. With this in mind, it has always been and always will be our mission to ensure Mother Nature comes first. In addition, for every 10 boards produced, 1 tree is saved.

## Our Concern

## Group Profile

Founded in 1982 by the late Mr. Amjad Ali Khan, Oriental Group started its journey in the real estate business. At present, the group has several concerns including: Oriental Wool Wears and Unique Sweater Industries, which are 100% export oriented garment industries and ship their products to Japan, Europe and North America; Oriental Power is the sole distributor of AIRMAN branded generators from Japan; OG Elevators is the only distributor of leading branded elevator- IFE Elevators in Bangladesh; Oriental Autos which imports new and reconditioned cars from Japan; Oriental Enterprise which is a trading house specializing in the import and export of goods across the globe; and of course Oriental Real Estate.

Recently, it has been noted that global warming is rapidly increasing. Therefore, in order to combat this, Oriental Group has decided to do their part for the environment by establishing Bangladesh's first and only eco-friendly composite wood manufacturing business - Oriental Eco Woods Limited.

## Oriental Eco Woods Profile

Oriental Eco Woods has the largest wood powder plant in Bangladesh that uses the latest European and Japanese technology. Everything from raw material collection, powder processing and manufacturing takes place at the Oriental Eco Woods factory premises in Bangladesh, making it the most efficient and productive wood composite manufacturing plant in South Asia.

The Oriental Eco Woods factory has a professionally passionate R&D department devoted to the wide world of Eco Woods material and innovation. Furthermore, being Bangladesh's only company specializing in the R&D of clean and green building material; Oriental Eco Woods specializes in sturdy, durable, maintenance free, eco-friendly and non-toxic composite wood products built to withstand the elements.

## Oriental Eco Woods Factory

The Oriental Eco Woods Ltd. factory is located in the nation's capital, right next to the Savar EPZ (Export Processing Zone) and just a few short minutes from the airport. State-of-the-art facilities and an imported large-scale production facility built with European and Japanese technology to ensure high quality products and efficient manufacturing processes.

The new factory premises is situated in a 300,000 square feet area owned by Oriental Group, the Oriental Eco Woods factory covers 110,000 square feet, while the factory and support offices take up 90,000 square feet. The factory buildings, sales office, manufacturing zone, storage department, QC department, shipping department employ more than 200 people including designers, administrators and workers. In addition, Oriental Eco Woods also owns and operates its own wood powder plant.

With highly efficient all-round production capabilities, green practices, a strong worker base, and both local & imported standard raw materials used in the plant. Oriental Eco Woods fulfills both local and global compliance issues while also being heavily engaged in both local and foreign markets when it comes to the manufacturing of eco-friendly wood-polymer composite products.

South Panishai, Zirani Bazar, Kashimpur, Gazipur

## Core Values

### Innovation

Constantly changing and improving our products and practices

### Responsibility

Doing our part for the planet

### Quality

Never compromising on what we deliver

### Creativity

Encouraging creativity to maintain our position as a market leader

### Partnerships

Providing a personalized level of services and attention towards our stakeholders

### Excellence

Exceeding expectations and excelling in what we do

# Product Profile

# Timber Tubes

Our innovative wood composite timber tubes have a variety of applications such as ceiling claddings, wall claddings, corridor railings, stair railings etc.

Size : 100mm X 50mm	Size : 100mm X 38mm
